GAZETTEER TO AMS 1:25,000 MAPS OF WEST GERMANY

Names in this gazetteer appear on AMS 1:25,000 (AMS M841 Series and AMS M842 Series) maps of West Germany. The index at the back of this gazetteer indicates the location of the sheets.

According to present plans, the M842 series (Bavaria 1:25,000) will eventually be converted to M841 sheet lines. Therefore, names appearing on present M842 sheets have been listed with reference to the anticipated M841 sheet layout and marked with an asterisk. A separate gazetteer exists for interim use with the M842 series.

Column I, Name.—Names are listed in the form in which they appear on the maps, alphabetized to 16 places. Alphabetization was accomplished in the following sequence: space, period, ampersand, hyphen, diagonal, comma, apostrophe, letters of the alphabet, and numerals 0 to 9.

Example:

KLEIN BERG	KLEIN - KARLE	KLEIN' FEN
KLEIN. AUMAN	KLEIN / GOLDACH /	KLEINE
KLEIN & KLEIN	KLEIN, GRUND	9 KLEIN

Note: Parentheses are represented by diagonals (see listing immediately above).

Some spelling corrections have been made to these names, with the result that the gazetteer indicates a more recent or preferred spelling than the maps. These changes will be incorporated into any revised map edition.

Column II, Designation.—Code designations in this column

describe the feature to which the name applies. For the key to the code designations used, see p. iv. Code designations have been limited to no more than four letters.

Column III, Grid Ref.—The grid reference for each name consists of a two-letter 100,000-meter square identification, followed by a four-digit number. The grid reference may be used to locate the named feature on the map in the following manner:

First, locate the north-south grid line labelled with the two large figures (ignore the smaller figures) corresponding to the first two digits of the grid reference in the gazetteer. Second, locate the east-west grid line in the same manner as the north-south line, but using the last two digits of the grid reference in the gazetteer. The named feature will be found to the east and north in the immediate vicinity of the intersection of these two grid lines. (The two-letter 100,000-meter square identification should be ignored.)

Column IV, Sheet No.—Sheet number shows the number of the map on which the named feature appears.

Column V, Lat.—The latitude of the named feature is given to the nearest minute, as computed from the scaled grid reference.

Column VI, Long.—The longitude of the named feature is given to the nearest minute, as computed from the scaled grid reference.

CODE DESIGNATIONS

Generic	Abbr.
AF	airfield, airport
AN	area name
AQDT	aqueduct
BAPL	bathing place
BAR	barracks
BDRY	boundary
BEAC	beacon
BLDG	building, castle, house, hut, cabin, lodge
BRDG	bridge
CARN	cairn(s)
CEM	cemetery
CHCH	church, chapel
CLIF	cliff(s)
CNAL	canal(s)
CNVT	convent
COMS	communications, radio station
COND	conduit
CRRD	crossroads
DEPR	depression
DTCH	ditch
EBKT	embankment
EST	estate
FERY	ferry
FLD	field, athletic field
FORT	fortification, earthwork, redoubt

Generic	Abbr.
FRST	forest
FTRY	factory
GAGE	water gauge
GRGE	gorge, ravine
HOLE	hole, pit
HOSP	hospital
ISL	island
LCKS	locks
LH	lighthouse
MDW	meadow
MONU	monument, triangulation station
MRSH	marsh, swamp
MT	mountain
MTS	mountain slope
NURS	nursery
OBSR	observatory
PARK	park, game reserve
PASS	passage
PAST	pasture
PAV	pavilion
PLDR	polder
PLN	plain(s)
PM	peat moor
POPL	city, town, village, settlement, hamlet
PPL	power plant
RDGE	ridge

Generic	Abbr.
RDIO	radio station
RR	railroad
RSTA	railroad station
RSVR	reservoir
SAND	sandy area
SCHL	school, college, university, academy
SCRB	scrub
SDLE	saddle
SHR	shrine, cross
SIGS	signal station
SITE	historical site; ruins
SLP	slope
SPRG	spring
SQ	square
ST	street
STDM	stadium
STR	strait
STRM	stream, water course
TRGE	target range
TRL	trail
TUN	tunnel
TWR	tower
UNIV	university
VAL	valley(s)
WRFL	waterfall
